Feature-by-Feature Setup & Use Guide
Your Behind-the-Chair Workflow, Upgraded

✂️ About Hair Butler™

Born from the hands of a working stylist, Hair Butler™ was created to bring function, flow, and freedom back to the art of hair extensions. Every magnet, add-on, and detail is intentionally designed to help stylists stay organized, move efficiently, and work with confidence behind the chair.

From independent artists to full salon teams, Hair Butler™ supports professionals who take pride in their craft and believe that tools should enhance—not interrupt—their creative rhythm. Our mission is simple: to simplify your workflow so you can focus on what truly matters—your artistry, your clients, and your growth.

Thank you for being part of the Hair Butler™ movement. Together, we're redefining what professional means—one install at a time.

1. Tripod & Tool Assembly

🔧 **What It Is:** The Hair-Butler™ tool attaches to a tripod (sold separately).
🛠️ **How to Use:** Clip on the end cap, secure the tool to the tripod, and adjust height—no extra tools needed. Setup takes just 5–7 minutes.
🔥 **Why It Matters:** Establishes a steady, ergonomic workspace right at your chair—no bending, no strain.

2. Dual Detangling Combs

💡 **What They Do:** Hold extension wefts or bulk hair securely across two full-length combs.
🧶 **How to Use:** Slot your loose hair or wefts by length, texture, or install order.
✔️ **Benefit:** Keeps hair tangle-free and clean while giving you instant access.

3. Tool Access Channel

🔧 **What It Is:** A clean, narrow slot between the combs for tools.
🛠️ **How to Use:** Tuck scissors, bead jars, sectioning combs, or loopers in this space.
✔️ **Benefit:** Eliminates mess on trays and keeps your go-to tools within reach.

4. Thread Holder (End-Cap Rod)

🧵 **What It Is:** A metal rod on the end cap that holds your thread like a spool.
🔁 **How to Use:** Slide the spool on and pull out just the length of thread you need.
✔️ **Benefit:** Prevents the thread from rolling around, saving time and reducing waste.

5. Magnetic Tool Strip

🧲 **What It Is:** A magnetic pad on the end cap.
🩹 **How to Use:** Snap on needles, tweezers, pliers, and nippers between steps.
✔️ **Benefit:** Keeps small metal tools secure and visible—no more dropped or lost pieces.

6. Durable Metal Construction

💪 **What It Is:** A handcrafted metal body capable of handling heat styling.
🔥 **How to Use:** Flat-iron, curl, blow-dry, or even color hair extensions right on the tool.
✔️ **Benefit:** Makes prepping efficient—no transferring between tools.

7. Two-Row Install Support

🪮 **What It Is:** Dual combs designed for multi-row installs.
🧵 **How to Use:** Separate rows across combs to follow your install order.
✔️ **Benefit:** Keeps processes clear and symmetrical—great for complex installs.

8. Storage & Portability

🚚 **What It Is:** Designed for easy breakdown and storage.
🛁 **How to Use:** Leave it mounted on the foldable tripod or detach and pack in its tube/tote.
✔️ **Benefit:** Protects the comb teeth during travel and ensures you're always ready to go.

✨ Your New Workflow Ally

Hair-Butler™ doesn't just organize—it transforms how you work. Every tool, weft, and accessory is cleanly displayed for seamless transitions, boosting speed, confidence, and professionalism.

💌 Connect with Hair Butler™
